MEMORANDUM TO: Colonel White

SUBJECT : Telephone Traffic

1. The statistics on telephone traffic for the month of November indicate very little reduction in the number of local calls from 123,923 to 123,593. The statistics indicate, however, excellent progress in reducing the number of long distance calls being placed thru the Agency operators. In so far as long-range dialing, the number of calls placed thru Agency operators has increased; the number of calls placed direct has also increased and for November was at the high mark.

2. The statistics for the next few months should indicate if the local calls are leveled off to about 120,000. If this is the situation, further reduction can only be obtained by use of more drastic measures than the present educational program.
